Flower Parts and Their Jobs

Match each basic flower part with what it does.

Draw a line to connect them.

FLOWER PART

1

Flower

2

Stem

3

Leaf

4

Roots

WHAT IT DOES

It absorbs water and nutrients from the soil and anchors the plant.

It makes food for the plant using sunlight, air, and water.

It is the colorful part that attracts insects and helps in making seeds.

It holds the plant up and carries water and nutrients from the roots to the leaves and flower.
